Subject: Niagara falls Blvd. Site T&D of Rad waste streams

Janelle,

Eric has been in contact with the Region and Remedial department concerning the T&D of the rad waste streams for the sites we have here. EPA is asking we stop our IFB development for the radiological waste streams as they intend to handle that directly through existing contracts they already possess and have in place for the Radiological waste streams. We may still have some roles and responsibilities that we will be filling in this T&D. This decision is being made based upon the cost savings that is expected to be experienced in taking this approach and should make the process a little easier, or at least that is what is expected to be the case. Call me if you wish to discuss.

Thanks.

Kevin Shaver
